codeforces.com/profile/Saif_Ahmed008
saif-sakib.github.io/portfolio

CSE undergraduate at MIST building LLM-powered and data-driven software. Built the FastAPI backend of an app that integrates the **Anthropic Claude API**, trained in AI/ML at JB Connect Ltd, and writes Python tooling for scraping, reporting and scheduling. Brings a strong algorithmic and mathematical base from competitive programming (**38th at ICPC Asia Dhaka Regional 2025**) and production engineering discipline as the **sole developer of a live finance platform**.

Live	38th	1700+	1722
solo-built finance platform, since Aug 2026	ICPC Asia Dhaka Regional 2025	problems solved • CF Specialist	CodeChef max rating • 3-Star

EDUCATION

B.Sc. in Computer Science & Engineering 2023 – 2027 (Expected)
Military Institute of Science and Technology (MIST), Dhaka | *CGPA* **3.58 / 4.00** *(up to Level-3, Term-2)*

Higher Secondary Certificate (HSC) | Govt. M. M. College, Jashore | GPA 5.00 / 5.00 2022

TECHNICAL SKILLS

Languages	Python, C++, Go, TypeScript, JavaScript, SQL, Bash
AI / LLM	Anthropic Claude API, Vercel AI SDK (Google, OpenAI), OpenAI-compatible APIs, mockable AI clients for tests
Python	FastAPI, Pydantic, SQLAlchemy, Alembic, requests, BeautifulSoup, Selenium, ReportLab, pytest, Ruff, Black
Data	PostgreSQL (Neon, Supabase), MongoDB, Oracle, MySQL, web scraping, REST APIs (Codeforces API)
Deployment	Docker, GitHub Actions, Vercel, Render, Sentry
Core CS	Data structures, algorithms (graphs, DP, segment trees), OOP, system design

PROJECTS

QuestBoard — Gamified Q&A Platform for STEM Students (Team) GitHub
Python, FastAPI, SQLAlchemy, PostgreSQL (Supabase), Anthropic Claude API, Codeforces API, pytest, Flutter, Render

- Students post "quests" with point bounties. **Wrote all of the current server code**: FastAPI, 7 routers, ~40 endpoints; Postgres schema with race-safe voting (UNIQUE), trigram search, RLS, and a point ledger moving points **atomically in one transaction**.
- **Anthropic Claude API** hints, rate-limited and refunded on failure; Codeforces API daily challenges and handle verification; **70 pytest tests** run in CI against a real Postgres; deployed on Render.

Hasnahena — Interest-Free Cooperative Finance Platform (Solo, in production) hasnahenafoundation.com | GitHub
Next.js, TypeScript, Go, PostgreSQL (Neon), Vercel, Render, Cloudflare

- Sole developer of a **live** finance platform for a Jashore cooperative (since Aug 2026): deposits, interest-free loans with guarantors, donations and disputes, with a transactional Go ledger and daily reconciliation.
- Verified with **400k-iteration** money property tests, a chi-square uniformity test of generated secrets, Postgres integration tests and a load test at **~180 postings/s**.
- Encrypted daily backups with CI restore drills, Sentry and UptimeRobot monitoring, and **45 ADRs** documenting design decisions.

MCC Website — MIST Computer Club Platform (Team, in production) GitHub
Next.js, Bun, Hono, PostgreSQL, JWT, Supabase, Docker Compose, GitHub Actions

- The club's live platform (Next.js, Bun/Hono API, Discord bot; Docker Compose). Built the **alumni directory end to end**: public listing, JWT-protected admin CRUD, Postgres migrations, Next.js pages; landing-page admin.
- Hardened contest-report rooms: input validation, idempotent adds and a **broken access control fix**, so read endpoints require an admin instead of any signed-in user.

LocalFix — Civic Engagement Platform (Team) GitHub
React (Vite), Node.js, Express.js, Oracle Database (PL/SQL), JWT, bcrypt, Helmet, Mapbox GL

- Complaint management system where citizens report civic issues (roads, waste) to authorities; role-based access control and optimized Oracle SQL queries **cut data retrieval latency by 40%**.
- Wrote ~95% of the Express API (Helmet, rate limiting, validation, JWT) and the Oracle schema: **14 triggers, 3 stored procedures, 3 views, 27 indexes**; plus a large share of the React client.

HallBridge — Digital Hall Management System (Team) GitHub
Next.js 16, React 19, TypeScript, MongoDB (Mongoose), Tailwind CSS, Supabase, Google OAuth 2.0

- Seat allocation, billing and notices for **500+ residents**, with student, staff and admin dashboards and a predictive meal planner that brought food wastage to near-zero.
- Wrote ~64% of the API and ~81% of the data models; **Google OAuth 2.0** sign-in with a CSRF state cookie, password reset with expiring tokens, and compound indexes with lean, projected reads.

BruteBuddy — Automated Security Testing Tool GitHub

Python, requests, ThreadPoolExecutor, CLI

- CLI for **automated fuzzing** and brute-force testing of login endpoints: multi-field and generated payloads, custom headers and cookies, automatic re-authentication; parallel requests run **3× faster**.

GyanTori — Peer-to-Peer Book Sharing (Team) GitHub

Java, JavaFX (FXML), Maven, MongoDB

- Desktop virtual library for **500+ students** to lend, borrow and catalog books, with a MongoDB schema for inventory relationships and transaction history.

TOOLS & SCRIPTS

- **Rank-Raven** *(Python, Selenium, BeautifulSoup, ReportLab)*: Codeforces activity reporter that generates styled PDF reports.
- **upsolve_tracker** *(Apps Script, Sheets, Codeforces API)*: schedules near-miss problems, times solves, detects AC automatically.
- **Code-Library** *(C++, LaTeX, Python)*: MIST_EagleForces ICPC team notebook with a script that builds the PDF.
- **Faculty-Evaluation** *(Python, Selenium)*: automates the university's faculty evaluation form.

EXPERIENCE

Industrial Trainee, JB Connect Ltd (JBC) 2026 | 4 weeks

Industry sessions on DevOps, backend engineering and AI/ML; tasks with the company's teams

- Team AI content-generation app (FastAPI, React): set up the backend's router → service → repository layers, env-driven settings, error-to-HTTP handlers, Alembic and Docker dev setup.
- Built the `POST /api/v1/generate` endpoint with a mock AI client behind an injectable FastAPI dependency; shipped through pull requests.

COMPETITIVE PROGRAMMING

Codeforces Specialist (max 1514) | **CodeChef** 3-Star (max 1722) | **1700+** problems solved (CF, CodeChef, LeetCode, CSES, AtCoder)

ICPC Asia Dhaka Regional 2025 *(univ. teams)*	**38th**	ICPC Asia Dhaka Regional 2024 *(univ. teams)*	**117th**

BUP IAUPC 2025	**Champion** / 28	Meta Hacker Cup 2024	**Round 2**

LEADERSHIP & TEACHING

President, MIST Computer Club Jun 2026 – Present

Vice President (May 2025 – Jun 2026) | Executive Member (May 2024 – May 2025)

- Lead club strategy and mentor **15+ core members** delivering **10+ technical events a year**; direct ICPC preparation camps and workshops reaching **200+ students**.
- As Vice President, coordinated programming workshops, contest initiatives and training for junior members.

Competitive Programming Instructor, MIST Computer Club May 2024 – Present

- Mentor **50+ junior students** in algorithms and contest strategy with an **80% retention rate**; curated **20+ problem sets** and mock contests, helping teams advance in ICPC preliminary rounds.

Web Security Instructor, MIST Cyber Security Club May 2024 – Jun 2026

- Ran hands-on **OWASP Top 10** workshops with real-world exploitation scenarios; trained **30+ students** in penetration testing and secure coding. Also Associative Member (May 2024 – Jun 2025).

Executive Director, Mentor Committee | coordinated security mentoring initiatives and learning tracks Jun 2025 – Jun 2026

Hackathons: MIST Intra Hackathon 2025 | BUP CSE Fest 2026 Hackathon (onsite)

CYBERSECURITY & CTFS

Cyber Drill 2025 (WTISD Hackathon)	**5th**	Bugcrowd USA CTF 2025	**34th global**
SMP CTF 2024	**13th**	BUET CTF 2024 (final round)	**18th**
Cyber Raid 2025 (final round)	**18th**	DIU Cybercon CTF 2025 (final round)	**18th**
BCS ICT Fest CTF 2025	**18th**	BUP CTF 2025	**18th**

Hands-on practice: PortSwigger Academy **70+ labs** (10+ categories) | PicoCTF **67+** | TryHackMe **29 rooms** | OverTheWire Natas
Training: Hands-on Ethical Hacking and Security Analysis (MIST Cyber Security Club) | eShikhon Ethical Hacking Live Course
