codeforces.com/profile/Saif_Ahmed008
saif-sakib.github.io/portfolio

CSE undergraduate at MIST who builds **and operates** production systems. Sole developer and operator of **Hasnahena**, a live finance platform on Vercel, Render, Neon and Cloudflare with CI/CD on GitHub Actions, encrypted off-site backups with restore drills, and Sentry, UptimeRobot and Prometheus monitoring. Competitive programmer (**38th at ICPC Asia Dhaka Regional 2025**).

Live	**RTO < 1 h**	**~180/s**	**$0**
in production since Aug 2026	restore drilled in CI • RPO 24 h	postings sustained in load test	hosting today, all on free tiers

EDUCATION

B.Sc. in Computer Science & Engineering 2023 – 2027 (Expected)
Military Institute of Science and Technology (MIST), Dhaka | *CGPA* **3.58 / 4.00** *(up to Level-3, Term-2)*

Higher Secondary Certificate (HSC) | Govt. M. M. College, Jashore | GPA 5.00 / 5.00 2022

TECHNICAL SKILLS

Cloud & Hosting	Vercel, Render, Neon (serverless Postgres), Cloudflare (DNS, TLS, R2, Workers, Email Routing), Cloudinary, Supabase
CI/CD	GitHub Actions (CI, CD, scheduled jobs), GHCR, Dependabot, gitleaks, Git hooks, pnpm monorepo
Containers & OS	Docker, Docker Compose, Linux (Arch/Ubuntu), deployment to Linux VMs over SSH, Bash
Observability	Sentry, UptimeRobot, Prometheus metrics, structured logging; backups, restore drills, RPO/RTO
Backend & Data	Go (chi, pgx), Node.js, Express.js, FastAPI, Bun, Hono | PostgreSQL, MongoDB, Oracle, MySQL
Testing	Playwright, Go tests (`-race`, integration, load), pytest, golangci-lint, Ruff, ESLint
Languages	Go, Python, TypeScript, JavaScript, C++, Java, SQL, Bash

PROJECTS

Hasnahena — Interest-Free Cooperative Finance Platform (Solo, in production) hasnahenafoundation.com | GitHub
Vercel, Render, Neon Postgres, Cloudflare (DNS, R2, Workers), Cloudinary, Brevo, GHCR, Sentry, UptimeRobot

- Build, deploy and operate a **live** finance platform serving real members since Aug 2026: Next.js on **Vercel**, Go API on **Render**, **Neon** Postgres, all behind **Cloudflare** DNS and TLS.
- **GitHub Actions** change-detected CI: lint, Go tests under `-race`, Playwright e2e, gitleaks, migration-drift and bundle-size checks; Docker images to **GHCR** with no-secrets-in-image checks; pre-push hooks mirror CI locally.
- Daily encrypted Postgres backups shipped to **Cloudflare R2** with a restore drill in CI (**RPO 24 h, RTO < 1 h**); daily ledger reconciliation; Prometheus drift metrics.
- Monitoring with **Sentry**, **UptimeRobot** (1-min health checks) and a scheduled business-threshold workflow; runbooks, 45 ADRs and a capacity plan from measured free-tier limits.

MCC Website — MIST Computer Club Platform (Team, in production) GitHub
Next.js, Bun, Hono, PostgreSQL, JWT, Supabase, Docker Compose, GitHub Actions

- The club's live platform (Next.js, Bun/Hono API, Discord bot; Docker Compose). Built the **alumni directory end to end**: public listing, JWT-protected admin CRUD, Postgres migrations, Next.js pages; landing-page admin.
- Hardened contest-report rooms: input validation, idempotent adds and a **broken access control fix**, so read endpoints require an admin instead of any signed-in user.

QuestBoard — Gamified Q&A Platform for STEM Students (Team) GitHub
Python, FastAPI, SQLAlchemy, PostgreSQL (Supabase), Anthropic Claude API, Codeforces API, pytest, Flutter, Render

- Students post "quests" with point bounties. **Wrote all of the current server code**: FastAPI, 7 routers, ~40 endpoints; Postgres schema with race-safe voting (UNIQUE), trigram search, RLS, and a point ledger moving points **atomically in one transaction**.
- **Anthropic Claude API** hints, rate-limited and refunded on failure; Codeforces API daily challenges and handle verification; **70 pytest tests** run in CI against a real Postgres; deployed on Render.

HallBridge — Digital Hall Management System (Team) GitHub
Next.js 16, React 19, TypeScript, MongoDB (Mongoose), Tailwind CSS, Supabase, Google OAuth 2.0

- Seat allocation, billing and notices for **500+ residents**, with student, staff and admin dashboards and a predictive meal planner that brought food wastage to near-zero.
- Wrote ~64% of the API and ~81% of the data models; **Google OAuth 2.0** sign-in with a CSRF state cookie, password reset with expiring tokens, and compound indexes with lean, projected reads.

LocalFix — Civic Engagement Platform (Team) GitHub
React (Vite), Node.js, Express.js, Oracle Database (PL/SQL), JWT, bcrypt, Helmet, Mapbox GL

- Complaint management system where citizens report civic issues (roads, waste) to authorities; role-based access control and optimized Oracle SQL queries **cut data retrieval latency by 40%**.
- Wrote ~95% of the Express API (Helmet, rate limiting, validation, JWT) and the Oracle schema: **14 triggers, 3 stored**

procedures, 3 views, 27 indexes; plus a large share of the React client.

BruteBuddy — Automated Security Testing Tool GitHub

Python, requests, ThreadPoolExecutor, CLI

- CLI for **automated fuzzing** and brute-force testing of login endpoints: multi-field and generated payloads, custom headers and cookies, automatic re-authentication; parallel requests run **3× faster**.

GyanTori — Peer-to-Peer Book Sharing (Team) GitHub

Java, JavaFX (FXML), Maven, MongoDB

- Desktop virtual library for **500+ students** to lend, borrow and catalog books, with a MongoDB schema for inventory relationships and transaction history.

TOOLS & SCRIPTS

- **Rank-Raven** *(Python, Selenium, BeautifulSoup, ReportLab)*: Codeforces activity reporter that generates styled PDF reports.
- **upsolve_tracker** *(Apps Script, Sheets, Codeforces API)*: schedules near-miss problems, times solves, detects AC automatically.
- **Code-Library** *(C++, LaTeX, Python)*: MIST_EagleForces ICPC team notebook with a script that builds the PDF.
- **Faculty-Evaluation** *(Python, Selenium)*: automates the university's faculty evaluation form.

EXPERIENCE

Industrial Trainee, JB Connect Ltd (JBC) 2026 | 4 weeks

Industry sessions on DevOps, backend engineering and AI/ML; tasks with the company's teams

- Team AI content-generation app (FastAPI, React): set up the backend's router → service → repository layers, env-driven settings, error-to-HTTP handlers, Alembic and Docker dev setup.
- Built the `POST /api/v1/generate` endpoint with a mock AI client behind an injectable FastAPI dependency; shipped through pull requests.

COMPETITIVE PROGRAMMING

Codeforces Specialist (max 1514) | **CodeChef** 3-Star (max 1722) | **1700+** problems solved (CF, CodeChef, LeetCode, CSES, AtCoder)

LEADERSHIP & TEACHING

President, MIST Computer Club Jun 2026 – Present

Vice President (May 2025 – Jun 2026) | Executive Member (May 2024 – May 2025)

- Lead club strategy and mentor **15+ core members** delivering **10+ technical events a year**; direct ICPC preparation camps and workshops reaching **200+ students**.
- As Vice President, coordinated programming workshops, contest initiatives and training for junior members.

Competitive Programming Instructor, MIST Computer Club May 2024 – Present

- Mentor **50+ junior students** in algorithms and contest strategy with an **80% retention rate**; curated **20+ problem sets** and mock contests, helping teams advance in ICPC preliminary rounds.

Web Security Instructor, MIST Cyber Security Club May 2024 – Jun 2026

- Ran hands-on **OWASP Top 10** workshops with real-world exploitation scenarios; trained **30+ students** in penetration testing and secure coding. Also Associative Member (May 2024 – Jun 2025).

Executive Director, Mentor Committee | coordinated security mentoring initiatives and learning tracks Jun 2025 – Jun 2026

Hackathons: MIST Intra Hackathon 2025 | BUP CSE Fest 2026 Hackathon (onsite)

CYBERSECURITY & CTFS

Cyber Drill 2025 (WTISD Hackathon)	**5th**	Bugcrowd USA CTF 2025	**34th global**
SMP CTF 2024	**13th**	BUET CTF 2024 (final round)	**18th**
Cyber Raid 2025 (final round)	**18th**	DIU Cybercon CTF 2025 (final round)	**18th**
BCS ICT Fest CTF 2025	**18th**	BUP CTF 2025	**18th**

Hands-on practice: PortSwigger Academy **70+ labs** (10+ categories) | PicoCTF **67+** | TryHackMe **29 rooms** | OverTheWire Natas
Training: Hands-on Ethical Hacking and Security Analysis (MIST Cyber Security Club) | eShikhon Ethical Hacking Live Course
